

Angel Omar Pedroza Cardenas

Software Engineer - Backen Developer

I am a passionate software engineer. I learned to program all the basics focused on the full stack. However, nowadays I am working and improving my backend and machine learning engineer skills, therefore I have improved my knowledge with python and its libraries for data processing and machine learning.

At the same time, I have used my knowledge in the other areas of development to provide features that are more congruent with the company's objectives and that at the same time are of the highest quality.

Experience

Agosto 2020 - Febrero 2021

RappiMaker

Rappi Inc. Bogota

An incredible experience working with the application. I learned how the system worked and became part of a great community.

Febrero 2021 - Actualidad

Backen Developer

Rappi Inc. Bogota

Developing solutions for rappi on the tech area like backend developer and learning the best practice in the industry.

Education

2017

Academic Bachelor

Instituto Alberto Merani Bogota

Various intercollegiate sports achievements in the institution's Ultimate Frisby team. Team created by me and a partner.

Thesis on teaching and democratic culture in schools as a graduation requirement.

2019 - 2021

Software Engineer

Holberton School Bogota

Constant and disciplined study within the academy. Enter without knowing absolutely nothing about programming or the world around you and here I learned everything I know so far. My qualifications are always considerably above the minimum required, thus seeking excellence.
